☎ +46 76 223 00 89

📍 Stockholm, Sweden

Summary

I am a senior AI Full-Stack Engineer with 8+ years of experience building scalable SaaS platforms, cloud applications, and AI-powered software solutions. Experienced in integrating AI technologies such as **OpenAI APIs**, **LangChain**, **TensorFlow**, and **Python** workflows into modern applications. Strong background in frontend development, backend engineering, API design, databases, cloud deployment, and system architecture. Skilled with **React.js**, **Next.js**, **TypeScript**, **Node.js**, **Python**, **PostgreSQL**, **MongoDB**, **AWS**, **Docker**, **microservices**, and **CI/CD**. Passionate about creating intelligent products that improve automation, efficiency, and user experiences.

Professional Experience

Senior AI Full-Stack Engineer

Celonis

07/2024 – 04/2026

Munich, Germany

- Built AI-powered enterprise workflow automation platforms that helped businesses analyze processes and make data-driven decisions. Developed AI features using **OpenAI APIs**, **LangChain**, **Python**, and **machine learning workflows**, reducing manual process tasks and improving user productivity.
- Developed AI-assisted features and automation pipelines that improved business workflows, reduced repetitive manual tasks, and enhanced user productivity through intelligent software solutions.
- Owned full-stack development across **frontend architecture (React.js, Next.js, TypeScript)**, **backend services (Node.js, Python, REST APIs, GraphQL)**, and **database systems (PostgreSQL)**. Improved application performance, scalability, and maintainability through optimized architecture and engineering practices.
- Built and deployed cloud-native systems using **AWS**, **Docker**, and **CI/CD pipelines**, improving deployment reliability, reducing release time, and supporting scalable enterprise workloads.

- Designed optimized data solutions and backend architectures using **PostgreSQL, microservices, and API-driven systems**, improving reliability, data processing efficiency, and enterprise application performance.

Full-Stack Engineer

Factorial

05/2021 – 01/2023

Barcelona, Spain

- Developed scalable SaaS applications for employee management and business workflows using **React.js, Next.js, TypeScript, Node.js, Python, Django, and Express.js**.
- Built reusable frontend components and optimized application architecture, improving user experience, maintainability, accessibility, and development efficiency.
- Designed secure backend services, **RESTful APIs, and third-party integrations**, improving system communication and supporting critical business operations.
- Optimized **PostgreSQL and MongoDB** databases through query improvements and data structure optimization, improving application performance and reliability.

Software Engineer

Stravito

02/2019 – 03/2020

Stockholm, Sweden

- Built enterprise knowledge management and business intelligence platforms using **React.js, TypeScript, Node.js, Python, and GraphQL**, improving information access and user productivity.
- Developed responsive frontend applications and reusable UI components, improving usability, performance, and consistency across enterprise products.
- Created backend APIs, services, and intelligent search features using **Node.js, Python, GraphQL, and AI technologies**, improving data discovery and application functionality.
- Designed scalable database solutions using **PostgreSQL, SQL, and MongoDB**, improving data reliability, query performance, and system efficiency.
- Applied cloud-native engineering practices using **AWS, Docker, microservices, and CI/CD automation**, improving scalability, deployment reliability, and software quality.

Education

Chalmers University of Technology

Bachelor of Computer Science

2013 – 2017

Gothenburg, Sweden

Skills

Frontend:

React.js | Next.js | Angular | Vue.js | JavaScript | TypeScript | HTML5 | CSS3

Backend:

Node.js | Python | Django | C#/.NET | Nest.js | Express.js | PHP | WebSockets | RESTful API Development | GraphQL

Database:

PostgreSQL(7+) | SQL | MySQL(8+) | MongoDB(8+) | Database Optimization

AI:

TensorFlow | LangChain | OpenAI APIs

Cloud Platforms:

Amazon Web Services (AWS) | Microsoft Azure | Google Cloud Platform (GCP)

DevOps & Containerization:

Docker | CI/CD Pipelines | Cloud-Native Architecture | Microservices Architecture

Version Control:

Git | GitHub | GitLab

AI Tools:

Cursor | GitHub Copilot | ChatGPT
